RE: Groundwater Assessment and Corrective Measures  
Dunn-Erwin Municipal Solid Waste Landfill, Harnett County  
Permit 43-02

Dear Mr. Jerry Blanchard,

The Solid Waste Section received an Assessment Action Plan proposed by ENSOL, Inc. on September 19, 2002 on behalf of Harnett County. Included in the proposal are additional observation wells and groundwater samples by using Geoprobe®.

The purpose of the action plan is to improve understanding of the limits of the groundwater contamination in the upper aquifer. Approval is granted as proposed.

Please proceed to implement the approved proposal and submit an assessment report in conjunction with the semi-annual sampling report for October 2002. If you have any questions please call me at 919-733-0692, extension 342.

Sincerely,

Cheryl Marks  
Environmental Compliance Unit  
Solid Waste Section
